VERSION	PREPARED BY	DATE	DESCRIPTION
1.0	Waad Alsohaibani	1\4\2026	First Version

3. TERMS OF REFERENCE

Terms	Description
NDA	Stands for Non-Disclosure Agreement. A legally binding contract establishing a confidential relationship between the parties to protect sensitive or proprietary information from unauthorized disclosure.
VPN	VPN stands for Virtual Private Network, is a service that establishes a secure, encrypted connection between your device and the internet by routing your data through a remote server.
OS Unit	An operating system unit serves as a bridge between the computer's physical components and the user, overseeing vital resources like storage, memory, and hardware devices
PHI	Protected Health Information, is defined as any individually identifiable health data that is created, received, maintained, or transmitted by a HIPAA-covered entity or their business associates.
Infrastructure Dept	Information system department manages the technology, data, and processes that support an organization's operations, decision-making, and strategic goals.
OTP	In cybersecurity, One-Time Password (OTP) refers to an automatically generated numeric or alphanumeric string that authenticates a user for a single login session or transaction.

4. INTRODUCTION

This Requirements Document will provide the requirements for VPN Requests Automation Both functional and non-functional requirements will be documented

4.1 PURPOSE

A VPN management system enables secure, centralized control and monitoring of remote access to organizational systems and data, ensuring compliance with security and access policies.

4.2 PRODUCT SCOPE

The VPN Request Project is a dedicated cybersecurity designed to facilitate a controlled and efficient workflow for remote access requests. By implementing an automated request module, the system enhances administrative oversight and process transparency. Central to the project's mission is the stringent protection of protected health information (PHI), prioritizing the prevention of any potential data leaks or security breaches.

5. SYSTEM ACTORS

Actor	DESCRIPTION
Company personnel	The company personnel shall request password reset and account renewal.
IT Project Manager	The IT project manager shall submit and edit a remote access request, populate all mandatory fields in the prescribed format, facilitate the execution of a Non-Disclosure Agreement (NDA) with the requester, and submit the finalized form.
Cybersecurity specialists	The Cybersecurity Specialist shall review and approve access requests, and communicate any identified issues via Email.
Cybersecurity Director	The Cybersecurity Director shall approve the request and have the authority to terminate account with justification
Head of OS Unit	OS Unit shall approve the request and create account.
Head of Infrastructure Department	The HOD shall have read only access and receives notification of requests creation.

6. BUSINESS PROCESSES AFFECTED

6.1 The following business processes are “in scope”:

- 6.1.1. Replace email-based inquiries with a centralized ticketing (Request Management) system.
- 6.1.2. Implement automated ticket capture, categorization, and SLA-based tracking.
- 6.1.3. Replace email folder tracking with a searchable centralized repository.
- 6.1.4. Enable audit, reporting, and historical data retrieval.

7. APPLICATIONS

7.1 The following applications are in scope”

- 1.1.1. Email
- 1.1.2. Myserv

7.2 The following applications are out of scope:

- 7.2.1 N/A

8. ASSUMPTIONS

- 8.1 The system will fully replace manual email sorting and ensure all inquiries are captured and tracked within the portal.
- 8.2 Authorized external users will have appropriate access to required information as defined by permissions.
- 8.3 All incoming requests will be recorded in a standardized format to ensure data consistency.
- 8.4 The IT Project Manager will act as the primary coordinator for system requests via the MyServ internal portal.
- 8.5 Internal users will have access to system functions based on their assigned roles.
- 8.6 The system will support bulk migration of legacy request data into the new platform.

9. CONSTRAINTS

- 9.1 Availability and reliability of external users' access to the portal (network/browser constraints).
- 9.2 Dependency on accurate role-based access configuration to prevent unauthorized access or data leakage.
- 9.3 Regulatory, security, or organizational policy changes that may affect system requirements or workflows.

10. RISK

- 10.1 NONE

11. RELATED DOCUMENTS

- 11.1. NONE

12. FUNCTIONAL REQUIREMENTS

REQUIREMENTS ID	REQUIREMENTS STANDARD	MUST/WANT	COMMENTS
FR001	The portal shall support English language.	Want	
FR002	The portal home page shall function as a centralized dashboard, displaying a comprehensive record of all submissions for the PM, CS, and OS team.	Must	
FR003	The portal shall provide role-based home pages for PM, CS, OS teams, and external user.	Must	
FR004	The system shall categorize account status as Active, Inactive, Locked, or Suspended.	Must	
FR005	The system shall track the lifecycle of a request through Pending, In Progress, Approved, and Rejected status.	Must	
FR006	The portal shall allow CS and OS users to view and submit access requests, including display of historical requests with status and submission dates.	Must	
FR007	The portal shall restrict request initiation rights exclusively to the Project Manager.	Must	
FR008	The system shall display the New Request Account Action functionality exclusively on the Requester's interface.	Must	
FR009	The Project Manager shall ensure the Requester executes the Non-Disclosure Agreement (NDA).	Must	
FR010	The system shall mandate the submission of the following data attributes to facilitate request and renewal processing: 1.First Name 2.Second Name 3.Family Name	Must	

		4.Email 5.Phone Number 6. Company Name 7. Project Name 8. Duration 9. Non-Disclosure Agreement Form		
	FR011	The system shall require users to provide a Data Integrity Attestation prior to submission.	Must	
	FR012	The Duration attribute shall be rendered as a standard text input field.	Must	
	FR013	The system shall start a validity countdown upon request completion, set to 90 days for new users and 180 days for renewals.	Must	
	FR014	The system shall provide a dedicated support interface or footer containing the Cybersecurity department's official contact information for inquiry resolution.	Must	
	FR015	The system shall include direct navigation links for password resets and account renewals within all automated password expiration notifications to facilitate external user access.	Must	
	FR016	The Portal shall have screen for setting a new password	Must	
	FR017	The system shall enforce standardized password complexity protocols and utilize Email-based One-Time Passwords (OTP) for external stakeholder authentication.	Must	The OTP will be numeric
	FR018	The System shall provide a user interface element that allows authenticated users to submit a renewal request.	Must	
	FR019	The Portal shall provide a file upload mechanism to allow users to attach a signed Non-Disclosure Agreement (NDA) to a renewal request.	Must	
	FR020	The VPN request and renewal request interface shall provide 'Submit' and 'Cancel' functionalities to	Must	

		enable users to either commit or discard their information.		
FR021		The Portal shall provide an 'OU Group Request' button to enable CS to initiate a request for Organizational Unit group creation.	Must	
FR022		The CS specialist interface shall provide 'approve' functionalities to enable users to approve the request.	Must	
FR023		The CS Director interface shall display the specific timestamp (date and time) of the CS Specialist's approval for each request.	Must	
FR024		The CS Director interface shall provide 'Approve' and 'Terminate' actions to facilitate the final determination of the request.	Must	
FR025		The system shall automatically dispatch an Email notification to both the Requester and the Project Manager upon the termination of a request.	Must	
FR026		The OS unit team interface shall display the specific timestamp (date and time) of the CS Specialist's and CS director approval for each request.	Must	
FR027		The CS specialist interface shall provide 'approve' functionalities to enable users to approve the request.	Must	
FR028		Upon the successful creation of a new OU Group by the OS Unit team, the system shall automatically dispatch a notification Email to the CS team.	Must	
FR029		The system shall automatically issue a notification to the Requester via Email upon create account.	Must	
FR030		The system shall automatically define the 'Start Date' as the calendar day the date of account creation.	Must	
FR031		Upon the successful approval and account	Must	

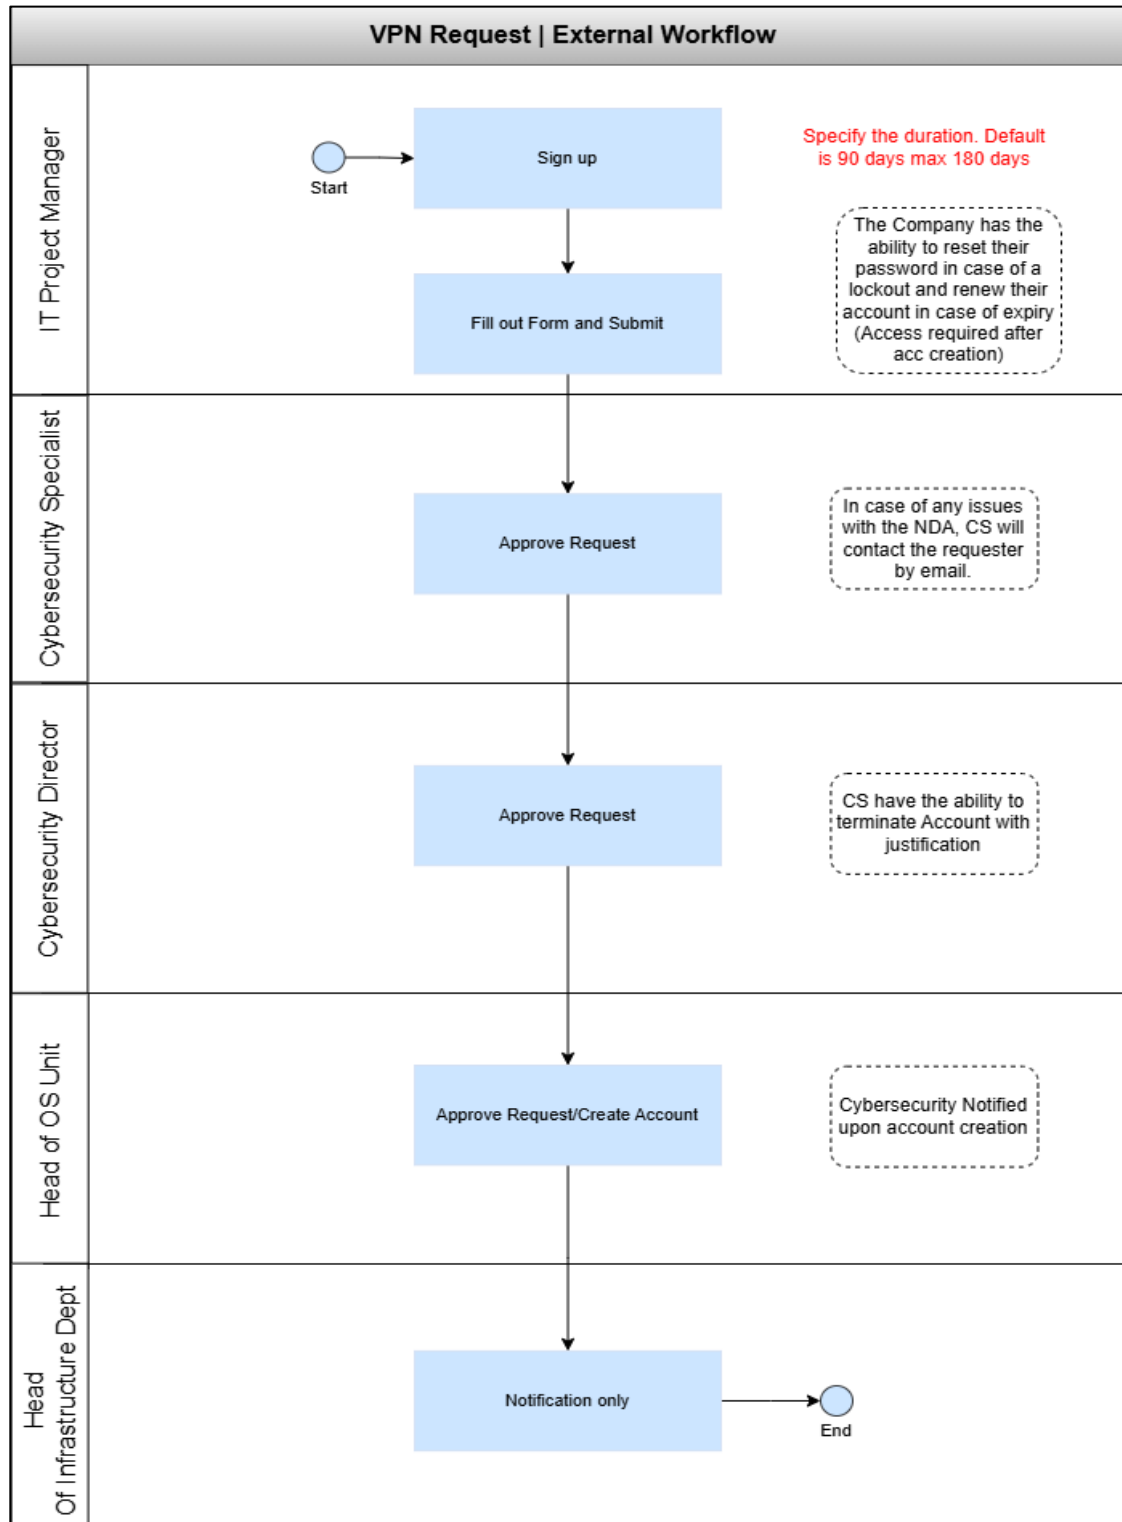

creation by the OS Unit,
the system shall update
the head of 'IS' interface
to display the request
status, serving as a formal
notification for the Head
of IS.

13. NON-FUNCTIONAL REQUIREMENTS

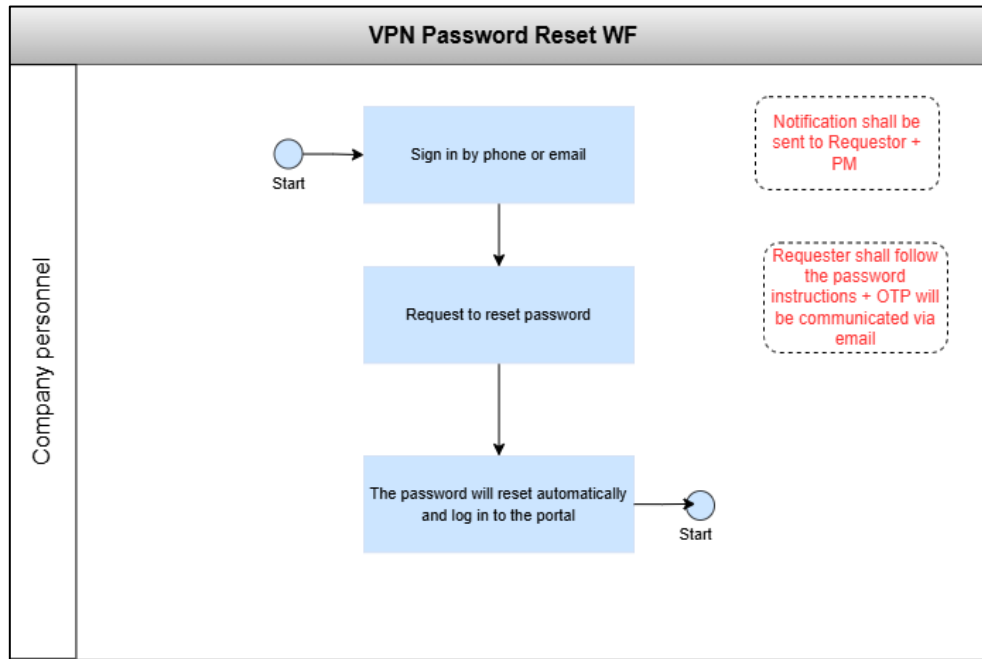

REQUIREMENTS ID	REQUIREMENTS STANDARD	MUST/WANT	COMMENTS
NR001	The Portal's internal feature set shall be accessible only through the corporate VPN or a dedicated Intranet connection to prevent unauthorized external exposure.	Must	
NR002	The Portal shall maintain a minimum availability uptime of 99.9%, excluding scheduled maintenance windows, to ensure consistent access for all stakeholders.	Must	
NR003	The system shall complete the end-to-end account creation process, from receiving the request to final account activation within five (5) business days.	Must	Account activation completed within 5 business days
NR004	The system must maintain a response time of two (2) seconds or less for 95% of all page requests and button clicks.	Must	2s response time for requests
NR005	The workflow for approval or termination must be completed by the responsible teams within two (2) business days to ensure system throughput.	Must	Requests are processed within 2 business days
NR006	The system shall maintain full cross-browser and cross-platform compatibility, supporting the most recent stable version of Google Chrome on desktop operating systems.	Must	

14. PROCESS FLOW:

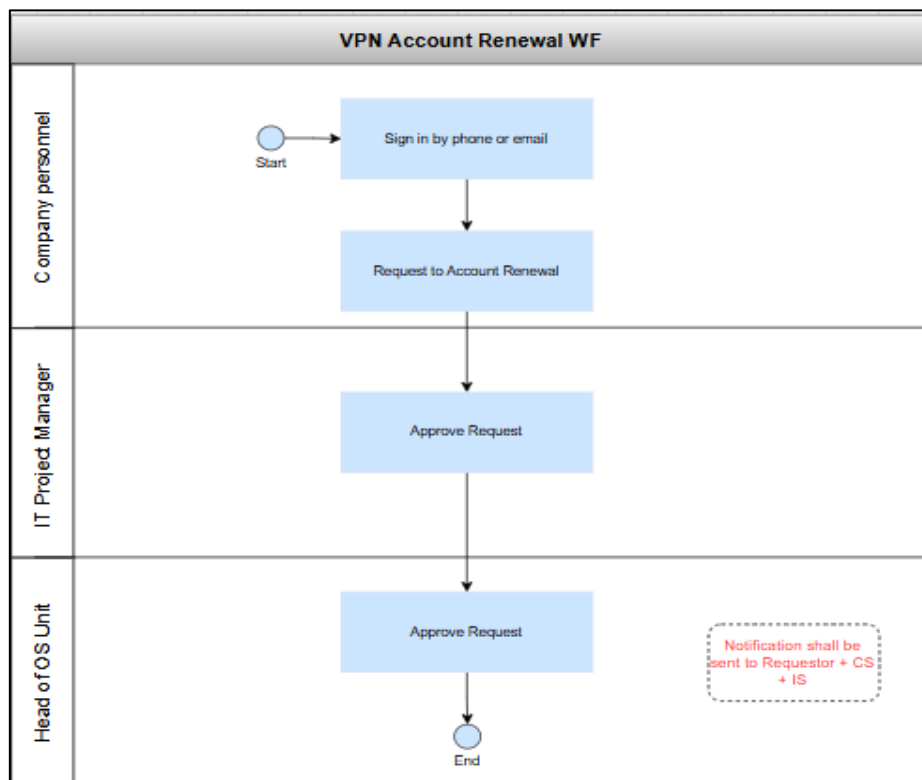

14.1. VPN Request

14.2.VPN Password Reset

14.3.VPN Account Renewal

15. SCREEN PROTOTYPE:

15.1.PM Requests List Screen:

PM Requests List Screen

RN	Requester Name	Email	Approval Date	Expiry date	Status	Account Status	Actions
001	ACME	contact@email.com	2022-01-23	2022-02-07	Complete	Active	
002	John Doe Ltd.	finance@johndoe.com	2022-01-09	2022-01-21	Pending Approval	Inactive	
003	Company Name	invoice@company.com	2022-02-11	2022-02-24	Expired	Disabled	
004	ACME	contact@email.com	2022-03-13	2022-03-26	Terminated	Suspended	

Rows per page: 1 - 10 of 406

- The above screen displays all the Requests, their status, account status, the date of the approve, the expire date, and the Email of the requester (IT Project Manager).
- Selecting the "Request Account" button will navigate the user directly to the **VPN Requester screen**.
- This screen shall appear to only the requester (IT project manager).

15.2. Request Account Screen:

VPN Request

Fill out the details below to request VPN Access.
Your request will be reviewed by an administrator

Company Name

ProjectName

Duration

Fill out the Non-Disclosure Agreement Form

☒ I hereby pledge that the data I provide and manage in this system is accurate, complete, and up to date to the best of my knowledge. I understand that accurate data is essential for effective decisions and system reliability.

Cancel
Submit

For Inquiries, Contact QUMC CyberSecurity at Cybersecurity@qumc.edu.sa

- The IT Project Manager shall populate the application form with the VPN User's mandatory details—including full name (First, Second, and Family), contact information (Email and Phone), Company Name, Project Name, and Duration— execution of the Non-Disclosure Agreement (NDA).
- When the IT Project Manager clicks the (NDA) button it should prompt to the NDA tab, where it can be uploaded as a PDF format.
- The portal shall display a dedicated contact point for formal inquiries within the portal.
- When the requester (IT Project Manager) clicks the submit button the request will be send to the cybersecurity specialist.

15.3.CS Requests list Screen:

CS Requests list Screen

RN	Requester Name	Email	Approval Date	Expiry date	Request Status	Account Status	Actions
001	ACME	contact@email.com	2022-01-23	2022-02-07	Complete	Active	
002	John Doe Ltd.	finance@johndoe.com	2022-01-09	2022-01-21	Pending Approval	Inactive	
003	Company Name	invoice@company.com	2022-02-11	2022-02-24	Expired	Disabled	
004	ACME	contact@email.com	2022-03-13	2022-03-26	Terminated	Suspended	

Rows per page:
 1 - 10 of 406

- The above screen displays all the Requests, their status, account status, the date of the approve, the expire date, and the Email to the requester.
- Selecting the "Add Old Accounts" button will navigate the user directly to the **VPN Requester screen**
- CS team is the only team that has authority to upload accounts history details.

15.4.Cyber Security Specialist Screen:

The screenshot displays a web form for requesting a new OU group. The form includes fields for First Name (Anjad), Second Name (Aqeel), Family Name (Al Mutairi), Email (ABC@ISC.Com), Phone Number (+971 388 546 738), Company name (ABC), Project Name (TrakCARE), Duration (90 Days), and Organization Unit Group (InterSystems). A 'Request OU' button is present. To the right, a 'Request New OU Group' dialog box is shown with a 'Write The New OU Group' input field, 'Request OU' and 'Cancel' buttons, and a yellow notification box stating 'OS notified by Email'. A red note indicates 'OS Screen for OU requests'. A red text block states: 'Duration is set by default to 90 days, system shall starts count upon request completion. Requester upon renewal can request a 180 days account validity'. At the bottom, there is a checkbox for a pledge and buttons for 'View/Export NDA' and 'Approve'.

- The screen will show the information of the requester and the NDA for the Cybersecurity specialist for validation.
- The cybersecurity specialist may request new OU group from OS team if a suitable value not available in list.
- After clicks on the request OU group, the request will be delivered to OS unit for creation, and upon creation CS team shall be notified to complete the request.
- Access Duration the Cybersecurity Specialist is responsible for determining access durations, which are standardized at 90 days for new users and 180 days for account renewals.

15.5.Cyber Security Director Screen:

First Name

Cyber Security Specialist Approved

Date/Time

Justification/Remark

Requester + PM will be notified of termination by Email

- The system shall display the current approval status of the request within the Approval Log screen with date/time for the cybersecurity director.
- The CS Director is the only actor that has the authority to terminate any request if necessary.
- After the director approve the request, it shall be sent to the OS team unit.

15.6.OS Requests list Screen:

OS Requests list Screen

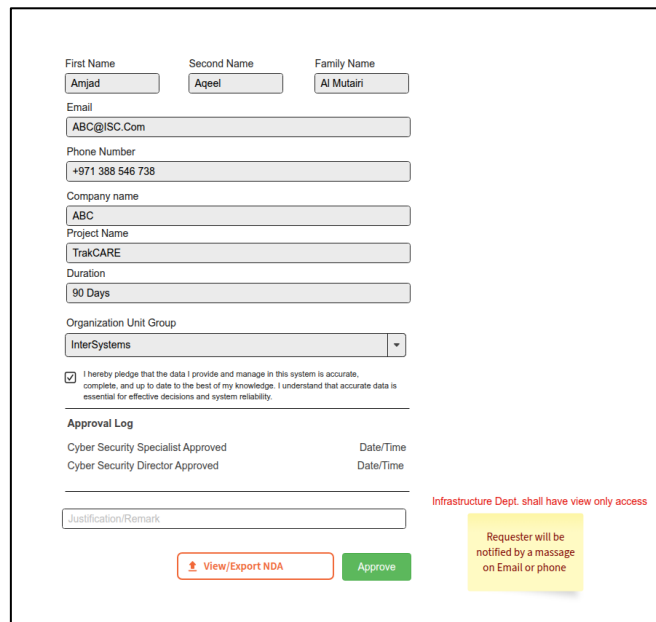

RN	Requester Name	Email	Approval Date	Expiry date	Request Status	Account Status	Actions
001	ACME	contact@email.com	2022-01-23	2022-02-07	Complete	Active	
002	John Doe Ltd.	finance@johndoe.com	2022-01-09	2022-01-21	Pending Approval	Inactive	
003	Company Name	invoice@company.com	2022-02-11	2022-02-24	Expired	Disabled	
004	ACME	contact@email.com	2022-03-13	2022-03-26	Terminated	Suspended	

New OU Group Requested for OS team only

Rows per page 1 - 10 of 406

- The above screen displays all the Requests the status, account status, the date of the approve, the expire date, and the Email to the requester.
- Through this page only OS unit team can request new organization unit.

15.7.OS Unit/ Infrastructure:

First Name: Amjad, Second Name: Aqeel, Family Name: Al Mutairi

Email: ABC@ISC.Com

Phone Number: +971 388 546 738

Company name: ABC

Project Name: TrakCARE

Duration: 90 Days

Organization Unit Group: InterSystems

☒ I hereby pledge that the data I provide and manage in this system is accurate, complete, and up to date to the best of my knowledge. I understand that accurate data is essential for effective decisions and system reliability.

Approval Log

Approval	Date/Time
Cyber Security Specialist Approved	
Cyber Security Director Approved	

Justification/Remark

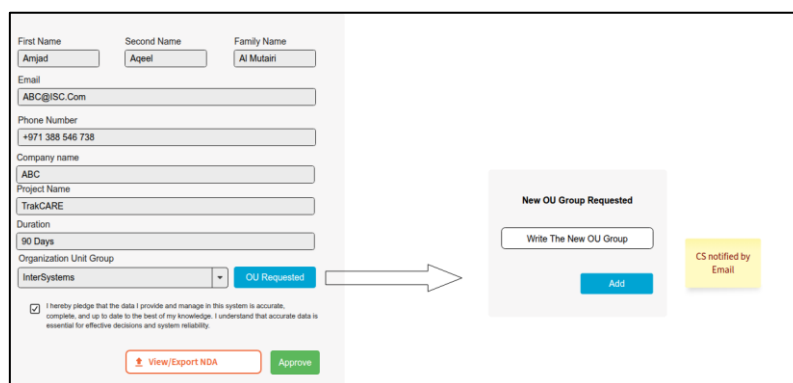

[View/Export NDA](#) [Approve](#)

Infrastructure Dept. shall have view only access

Requester will be notified by a message on Email or phone

- The system shall display the current approval status of the request within the Approval Log screen with date/time For the OS unit.
- Upon approval by the OS team, an account will be created for the requester.
- Upon account creation, the following actors shall be notified: IT Project Manager, VPN User, CS Team.

15.8.OU Group Addition:

First Name: Amjad, Second Name: Aqeel, Family Name: Al Mutairi

Email: ABC@ISC.Com

Phone Number: +971 388 546 738
